Reflection for AFS Stakeholders after Completing Participant Safety Modules

What three things surprised me most from the training?

In my perspective, what are the three greatest barriers AFS faces in identifying, stopping, and preventing sexual abuse in our programs?

What three things will I start doing differently (or being more mindful of) to help keep AFS participants safe?

If I have ANY concerns for participant safety, what specific steps will I take to report or address those concerns?

If a participant ever discloses abuse to me, how will I respond? What will I do to create an environment where the participant feels safe talking with me?

If I observe other AFS volunteers perpetuating myths and misconceptions about child sexual abuse, how will I help educate them about the truths of sexual abuse?

Check the box that best describes your understanding of the Participant Safety Modules:

- I fully understand the content from the Participant Safety Modules, AFS expectations for participant safety, and my own role in keeping AFS participants safe.
- I still have questions about the content from the Participant Safety Modules, AFS expectations for participant safety, and my own role in keeping AFS participants safe. My questions are:
